

You are required to make a mock of social media. This will have a few features which must be implemented accordingly. The requirements are as follows:

a) load profile

b) update profile age

c) Make new Friend

d) like a celebrity

e) show liked celebrities.

Each option must be dealt as a **PROCEDURE** in your program. The user may choose any of the 5 procedures to run. The specification for each **PROCEDURE (option)** is provided below.

· **Load Profile:** will print the name, age, and how many friends he has (start with 0 initially).

· **Update Profile age:** will replace the age of the user by incrementing it by 5 and printing it

· **Make New Friend:** will increase the friend count for the user and print it.

· **Like a celebrity:** will give the user an option to like at most 3 celebrities from a list of 5 celebrities.

A sample list of names is given below but you are most welcome to change the names.
['John', 'Brad', 'Fox', 'Police', 'Joe'].

· **Show liked celebrities:** will show the current user's 3 liked celebrities. (Hint: use an array)
